LinkedIn: Sanjjiiev S | GitHub: sanjjiiev | Portfolio: sanjjiiev.github.io

Professional Summary

Innovative B.Tech Computer Science Engineering student with a strong foundation in secure system architecture, Artificial intelligence system, and full-stack development. Experienced in building NIST-compliant applications, blockchain voting systems, and AI-driven analysis tools. Proficient in React.js, Node.js, Flutter, and NLP. Dedicated to leveraging technology to solve complex real-world problems.

Education

Amrita Vishwa Vidyapeetham

B.Tech in Computer Science Engineering (Core); Current CGPA: 7.63

Coimbatore, India

Aug 2023 – May 2027

Technical Skills

Languages: Python, Java, C/C++

Web & Mobile Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Flutter, Dart

AI & ML: PyTorch, Pandas, NumPy, Scikit-learn, OpenCV, Data Handling, TensorFlow, Cuda C++

Database Management: MySQL, MongoDB, PostgreSQL, SQLite

Tools & Platforms: Linux, Git/GitHub, MatLab, Google Maps API, VSCode, Hugging Face, Android Studio, Firebase, Supabase

Embedded Systems: Arduino, Raspberry Pi, STM32, Sensor Integration, Microcontrollers

Security & Networking: OSI Layers, IP Addressing, Wireshark, Cisco Packet Tracer, OSINTgram, Metasploit Framework, BeEF

Design: Blender, Figma

Projects

ResearchVault 🗝️ | *Secure Web App, Cryptography, NIST Standards, MFA*

- Secure web application designed for universities to manage the submission, review, and publication of research papers.
- Adheres to NIST security guidelines, implementing hybrid encryption for data privacy and digital signatures.
- Features multi-factor authentication (MFA) for rigorous access control and administrative integrity.

Dark Money Tracker 🗝️ | *NLP, Python, Data Visualization, Financial Intelligence*

- Financial intelligence tool designed to analyze and visualize transaction flows from the Epstein documents (DOJ Archives).
- Utilizes Natural Language Processing (NLP) to extract financial entities and amounts from unstructured text.
- Presents extracted data in an interactive dashboard to visualize complex transaction networks.

BlockDrive 🗝️Client | 🗝️Server | *Python, FastAPI, Docker, Custom Blockchain*

- Built a zero-knowledge decentralized file storage platform that encrypts (AES-128), shards, and distributes files across fault-tolerant storage nodes.
- Engineered a custom Proof-of-Work blockchain from scratch with SHA-256 hash chaining and Merkle tree validation for tamper-proof metadata.
- Designed a firewall-bypassing HTTP relay architecture, containerizing and deploying the system utilizing FastAPI, Streamlit, Nginx, and Docker.

Knowva 🗝️ | *React.js, Node.js, Express.js, OpenAI, Defang*

- Web-based application designed to provide a personalized, interactive, and efficient learning experience.
- Adapts to user learning needs by offering practice problems, revision tools, and resource integrations.

AmritaFind 🗝️ | *Flutter, Dart, Google Gemini API, Firebase, Cloudinary*

- Engineered a smart mobile solution utilizing Google Gemini API to match lost items with found reports.
- Features a 24/7 support chatbot, real-time item tracking, secure student authentication, and integrated chat.

Campus-Connect 🗝️ | *React.js, Node.js, Express.js, MongoDB*

- MERN stack web application designed to enhance collaboration and communication among university students.
- Community-driven platform for posting requirements, finding teammates, and making announcements.

Awards & Achievements

Bootstrap '25 Defang.io Hackathon: 3rd Place. Developed an AI-powered Personalized Learning Management System.

Uyir Hackathon Finalist: Developed an AI-powered SOS system for autonomous vehicles.

Swachhata Hi Seva Campaign - NSS Certification: Recognized for active participation in the National Service Scheme (NSS) camp.
